Tri-City Cardiology Announces New Arrhythmia Center

Mesa, AZ (Oct. 30, 2017) -Tri-City Cardiology is pleased to announce the opening of our new Arrhythmia Center, located at 6750 E. Baywood Ave., Suite 506, Mesa, AZ, 85206. The new Arrhythmia Center will enable us to provide specialized services to patients with abnormal heart rhythms and cardiac devices.

Our board-certified electrophysiology (EP) providers are located at the new Arrhythmia Center:

Kai Sung, MD
Arun Kolli, MD
Hicham El Masry, MD
Amy Kleinhans, DNP

“The arrhythmia center coalesces all aspects of arrhythmia management in one setting, including clinical care, device management, anticoagulation monitoring, and procedure arrangement,” said Kai Sung, MD. “Our hope is that our patients will have an integrated experience in their arrhythmic care and from a physician perspective I feel our arrhythmia center allows us to provide comprehensive care at all time.”

Our EP team has advanced training diagnosing, treating, and caring for patients who have electrical conduction irregularities of the heart or abnormal heart rhythms. The abnormal heart rhythms can cause irregular heartbeats, skipped beats, or extra beats, and can be symptomatic; including heart palpitations, dizziness, and syncope (fainting). Our goal is to bring state-of-the-art treatments and procedures to our clinic and provide quality care to our patients.

To schedule an appointment at Tri-City Cardiology, call 480-835-6100 or visit TriCityCardiology.com for additional information on our services and providers.

About Tri-City Cardiology

Established in 1979, Tri-City Cardiology is widely known for its progressive and innovative approach to heart and vascular services. Tri-City Cardiology consists of 23 board-certified physicians coming from some of the top medical universities and fellowship programs in the country. We provide comprehensive services, including medical cardiology, diagnostic testing, interventional cardiology, electrophysiology, peripheral vascular testing, medical imaging, vein center, and disease management clinics (heart failure, anticoagulation, and device). Tri-City Cardiology has multiple office locations in the Phoenix Metropolitan area.
